SANJEET KUMAR

Java Backend Developer (Fresher)

To,
The Hiring Manager,
Date: January 6, 2026

Dear Hiring Manager,

I am writing to apply for the **Java Backend Developer Internship / Fresher** position at your organization. I am a motivated and detail-oriented computer science graduate with a strong foundation in Java backend development and a keen interest in building secure, scalable, and high-performance applications using Spring Boot.

I am currently pursuing my **Bachelor of Computer Applications (BCA)** and have been consistently working on practical, real-world backend projects alongside my academic curriculum. Through hands-on development, I have built more than **25 RESTful APIs** using Java, Spring Boot, Spring Security, JWT, OAuth2, and MySQL. I focus on writing clean, modular, and maintainable code by following layered architecture and SOLID principles. These experiences have helped me understand how real backend systems are designed, secured, and scaled.

One of my major academic projects, **MyTeachingApp**, is a secure Learning Management System developed using Java and Spring Boot. The system supports three user roles—Student, Teacher, and Admin—with role-based authorization. I implemented JWT-based authentication along with OAuth2 login using Google and GitHub. Teachers can create and manage courses, while students can securely browse and enroll in courses. This project significantly strengthened my understanding of Spring Security, Spring Data JPA, REST API design, and real-world backend workflows.

Along with backend development, I have a strong command of core computer science fundamentals, including **Data Structures & Algorithms, OOPs, DBMS, Operating Systems**, and basic System Design concepts. I regularly practice problem-solving and have solved over **200 problems on LeetCode**, which has improved my logical thinking, coding efficiency, and debugging skills.

I am comfortable using Git and GitHub for version control and collaboration, and I use Postman for API testing and validation. I am eager to learn industry best practices, work under experienced mentors, and contribute positively to a development team while continuously improving my technical and professional skills.

As a fresher, I bring strong enthusiasm, a learning mindset, and dedication to delivering quality work. I am confident that this internship / entry-level opportunity will allow me to grow as a backend developer while adding value to your organization.

Please find my resume attached for your review. I would be grateful for the opportunity to discuss my profile further.

Thank you for your time and consideration.

Warm regards,

Sanjeet Kumar
